AMERICAN MARSH DUPLEX STEAM PUMP

3"x 2"x3" #190925 length 23" width 8", weighs 100#. Appears to have seen minimal service. The steam inlet is 3/8" P.T. and the water suction is 1 1/4" P.T. with 1" P.T. discharge. There is a removable bracket for a mechanical steam cylinder oil pump, or remove the bracket and use a hydrostatic steam oiler. Suitable and small enough to mount on and supply boiler feed water for: steam traction and portable engines, steam rollers, and steam shovels and cranes, stationary steam boilers etc. where 1" P.T. feed water line is used. In process of restoration.
